

# VALENTIN YORDANOV

PORTFOLIO 2016 - 2023  
SELECTED WORKS

Valentin Yordanov born 1986 in Bulgaria, lives and works in Las Vegas, USA.

For more than a decade, Valentin Yordanov has been an artist in residence in beautiful Las Vegas. He received his Bachelor of Fine Arts in Bulgaria, and then was awarded a scholarship to pursue his M.F.A. at the Bucharest National Academy of Arts, Romania and Bulgaria. His studies included intensive drawing trips and major exhibitions around Europe, including Vienna and Budapest. After completing his education, this urban explorer was on his way to enlarging his mental maps, discovering the new world, and setting up his studio in Las Vegas.

Valentin Yordanov is part of art collectors around the world including celebrity Chef Nobu, The Mayor of Las Vegas, Meow Wolf, Life Is Beautiful, The City of Las Vegas, MGM International, Nevada State Collage. He has exhibited extensively including solo exhibitions Capitol Mural, Building 63, Seoul, Korea (2017), The City of Las Vegas, NV, USA (2017), Art Pop Gallery Billboard, NV, USA (2017), Live is Beautiful Festival (2016), Beyond Borders, The Studio, Las Vegas USA (2015), City Center, Aria Hotel and Casino, USA (2015), Brett Wesley Gallery, USA (2011), Contemporary Art Gallery, Bulgaria (2010), Exhibition, Contemporary Center, Bucharest, Romania (2009).

Inspired by the phenomena of urban generation, globalization and changing environment. Valentin Yordanov is a contemporary explorer. His Geometrical Abstract paintings act like a travelogue, impressions of locations he visits or dreams about. Mountains, roads, rails and raising constructions offer a dynamical view of a changing environment around us. They are complex of layer and directions. As maps, Valentin Yordanov paintings take us on tour in impact of the invisible world around us. The geography itself becomes unsettled. The ground twist awkwardly in time and space, brightly colored shapes, plan drawings, high-impact graphics each place becomes with the logo 'non-place', a triumph of color and shape. Valentin Yordanov was born in the city, seemed to have always been able to capture that uniqueness in the works he dedicated to the city, with bold colors, elongated vantage points and cartoon aesthetic.

He makes vibrant paintings and installations centered on themes of travel, tourism, globalization and urbanism. Combining the factual precision of traditional street maps with his own interpretation of the local environment, these large scale composition documented the artist's perception of the great cities of Europe, Asia and North America. Valentin has since created large-scale dynamic installations that are built up from individual components comprising paintings, drawings, photographs, wall drawings and sculptural, billboard-like constructions.

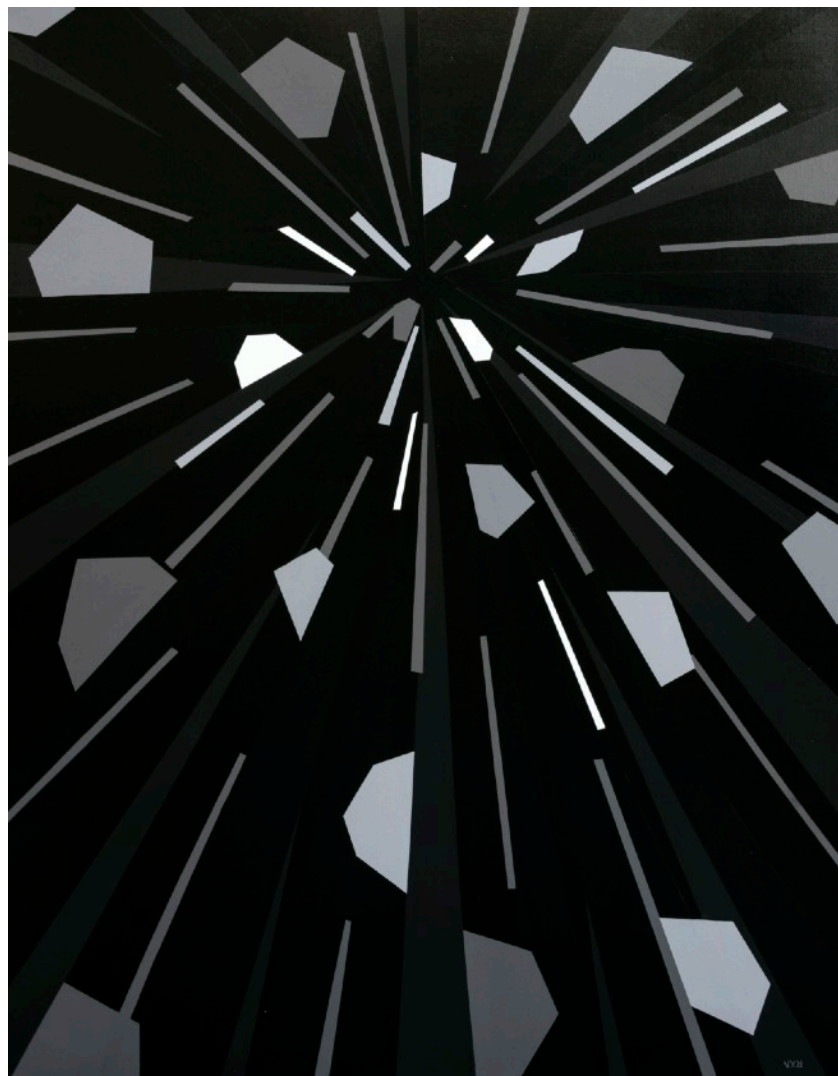

His painterly practice originally developed as a way to document his traveling with "Urban Maps" drawings and his artistic freedom and work with deeper subjects than the ones he used in his monument scale paintings.

His passion on traveling, architecture and design gives him the ability to capture and suggest the feeling and ambience for the places he visits. Always successfully employ the ambiguous yet crucial element of mix media to his work, Valentin Yordanov's paintings are filled with clues of questionable trustworthiness. His work frequently deals with the double side of tourism glamour, speed and consumption of international travel.
